LATEST NEWS

Welcome to the April 2011 edition of the Iron Balls newsletter. In this edition I will be detailing a few bits and bobs on what is available, new additions and breeding plans. Please feel free to contact me with any questions or queries. – Jules

WHAT'S AVAILABLE?

SPIDER MALE

Spiders are awesome and a must for any collection and/or breeder.

They are typified by amazing colour and pattern, as well as a very strong feeding and breeding response.

R4000.00

HET GHOST MALE

This beautiful male carries the recessive Ghost gene. To get a Ghost you can breed him to a female, keep the females back and then breed them back to dad. Ghosts are used to make some awesome looking designer morphs.

R1150.00

My plan for the 2011 breeding seasons will hopefully yield the following:

- NORMALS**
- SPIDERS**
- PASTELS**
- BUMBLEBEES**
- AXANTHICS**
- HET AXANTHICS**
- CINNAMONS**
- PEWTERS**

It may be all or none of the above, I will be able to confirm once breeding starts.

I was recently lucky enough to take possession of the following morphs to improve my collection.

Super Pastel

The homozygous form of the pastel morph. This male, when bred, will produce all Pastel offspring.

A real powerhouse when it comes to producing designer morphs

WHAT'S NEW?

Yellow Belly

Whilst this morph is very 'Normal' looking, when bred together they produce the stunning Ivory ball python. Also the Yellow Belly is a great ingredient if you want to clean up other morphs.

E&OE – For further info on the Ghost and Ivory morphs type into google 'ghost ball python pics' and 'ivory ball python pics' – Google is your friend...lol...bye...Jules
